EXPERIENCE

Junior Frontend Developer

Neiro.ai

📅 2023 - 2024 📍 San Francisco, CA.

Neiro AI is a deep learning start-up with 50+ members with $100m+ annual revenue.
Assisted in the development of web applications using frontend stack of **React, TailwindCSS + CSS Modules, MobX, Firebase, Figma.**

https://studio.neiro.ai
- Developed responsive UI according Figma designs.
- Used Redux for state management (migrated to MobX).
- Integrated moneti (square.up) and developed UI for the flow with adding celebrating animation using Particles.js.
- Integrated Firebase and Google Analytics.
- SEO optimization using Lighthouse (90+).
- Perfomance optimization with code splitting and lazy-loading.

https://neiro.ai/
- Developed responsive landing page according Figma.
- Improved website accessibility following WCAG guidelines
- Reached SEO scores of 95+ using Lighthouse.
- Intergrated Firebase to make users free to contact with Support Team and Google Analytics for business purposes.
- Used Anime.js for implementing animations.

PROJECTS

Telegram Scrapper

https://github.com/hypnosisflow/tgcli

Simple tool for extracting Users information and messages from certain group chat using chat ID.
React, TailwindCSS, Context API, Node (Express), Telegram API, Chat-GPT 3.5 API, ElephantSQL.

Easy as one-two-three flow:
- Choose period and request history of Group Chat by ID and get data sorted by Users list with their messages.
- Add list to dashboard and reuest full avalible information about Users accounts. Make last manipulations before sending data to Database.
- On Database page you can get all users with used filters and date when the repotrs were done.

Expeperimental feature:
- Simply copy User ID and analyze conent for positive/neutral/negrative mood with help of Chat-GPT.
